Application to Certify Completion of an Aerospace Engineering Minor

Applicant Information

Name: __________________________________________  CUID: ___________________  NetID: _______

Major: ________________________________  Projected Graduation Date (month/year): ________________

Courses Applying to Minor:
Please list each course you have taken, or plan to take, which will apply to the engineering minor program as described on the reverse of this form. Include the semester/year in which you completed, or plan to complete, each course, as well as the number of credits for each.

NOTE: The minor must be offered by a department other than that which offers your engineering major(s), and is contingent upon successful completion of Bachelor of Science degree requirements.

Course 1:__________________  Semester & Year Completed:____________  Number of Credits:______
Course 2:__________________  Semester & Year Completed:____________  Number of Credits:______
Course 3:__________________  Semester & Year Completed:____________  Number of Credits:______
Course 4:__________________  Semester & Year Completed:____________  Number of Credits:______
Course 5:__________________  Semester & Year Completed:____________  Number of Credits:______
Course 6:__________________  Semester & Year Completed:____________  Number of Credits:______

- The courses you’ve selected will be reviewed by the department and you will receive an email approval of your proposed plan. If at any point you need to make changes to this course plan, please contact the MAE undergraduate office. Revisions to your minor course plan will be submitted for review and you will again, receive email approval.
- Your application will go through final review after you graduate, at which point you will receive confirmation that completion of the minor has been submitted to the Engineering Registrar for processing.
- The minor will be listed on your official transcript.

Please submit this completed form to Emily Ivory or Kae-Lynn Wilson in 125 Upson Hall.
Minor in Aerospace Engineering

Offered by: Sibley School of Mechanical and Aerospace Engineering
Administered by: MAE Undergraduate Coordinator, 125 Upson Hall
Eligibility: All undergraduates.

Educational Objectives: The aerospace minor develops the engineering analysis and design skills necessary for creating and understanding aerospace vehicles and their subsystems. The minor includes diverse topics relevant to applications both in the earth’s atmosphere (e.g. aerodynamics) and in space (e.g. spacecraft thermal systems or orbital mechanics). Students in this minor will take at least four core aerospace courses, along with up to two supporting courses in engineering fundamentals or courses with applicability to aeronautics and spacecraft.

Requirements:
Six courses from the lists below, each worth at least 3 credits. No substitutions will be accepted from other departments at Cornell or elsewhere. Any course used to satisfy early MEng graduation requirements may not be used for the Aerospace minor.

Rules for ME majors:
a) Select at least 4 courses from group A, of which you must choose MAE 3050 or MAE 4060 (or both).
b) Select at most 2 courses from group B. No courses from group C may be used.
c) Two courses must be selected from the Aerospace Engineering subject field under the Major Approved Electives list in Mechanical Engineering (for a complete listing, consult www.mae.cornell.edu). These two courses may not be used to fulfill any B.S., Mechanical Engineering degree requirements.

Rules for other majors:
a) Select at least 4 courses from group A, of which you must choose MAE 3050 or MAE 4060 (or both).
b) Select a total of at most 2 courses from group B and group C.
c) Students may not use any courses to satisfy requirements of both the Mechanical Engineering Minor and the Aerospace Engineering Minor.

Academic Standards: A grade of C- or better in each course. In S/U only courses, S is acceptable.

GROUP A: Core Aerospace Engineering
MAE 3050: Intro to Aeronautics
MAE 4060: Introduction to Spaceflight Mechanics
MAE/ECE 4150: GPS: Theory and Design
MAE 4160/4161/5160: Spacecraft Technology and Systems Architecture
MAE 4291*: Supervised Senior Design Experience, with Aerospace Focus, or MAE 4900*: Individual and Group Projects in Mechanical Engineering, with Aerospace Focus
MAE 4230/4231/5230: Intermediate Fluid Dynamics
MAE 4510/5510: Aerospace Propulsion
MAE 4560/5560: Bioastronautics and Human Performance (not offered after Spring 2018)
MAE 5070: Dynamics of Flight Vehicles

NOTE:
MAE 4291 and 4900 require an email or note from the project advisor, stating that the project focuses on Aerospace and is suitable for the minor. MAE 4291 or 4900 must be worth at least 3 credits. Students may count at most one MAE 4291 OR one MAE 4900 toward the minor (i.e. students may not count both MAE 4291 and MAE 4900 toward the minor).

GROUP B: Courses Applicable to Aerospace Engineering
MAE 4020/4021/5020: Wind Power
MAE 4130/4131: Mechanics of Composite Structures
MAE 4180/5180/CS 3758/ECE 4180/5772: Autonomous Mobile Robots
MAE 4700/4701/5700: Finite Element Analysis for Mechanical and Aerospace Design or CEE 4720: Introduction to the Finite Element Method
MAE 4730/5730: Intermediate Dynamics and Vibrations
MAE 4780/5780 Control Systems
MAE 5130: Mechanical Properties of Thin Films
MAE 5430: Combustion Processes
MAE 6510: Advanced Heat Transfer

GROUP C: Fundamentals
ENGRD 2020: Statics and Mechanics of Solids
MAE 2030: Dynamics
ENGRD 2210: Thermodynamics
MAE 3230: Introductory Fluid Mechanics
MAE 3240: Heat Transfer
MAE 3270: Mechanics or Engineering Materials
MAE 3260: System Dynamics
MAE 3780/3783: Mechatronics or ECE/ENGRD 2100: Intro. to Circuits for Electrical and Computer Engineers or PHYS 3360: Electronic Circuits.
